## Safe Ladder Placement Quiz

Name \_\_\_\_\_

Date \_\_\_\_\_

- |  | True                     | False                    |
|--|--------------------------|--------------------------|
| 1) Use of safety cones should be used when your ladder is placed in a traffic area to warn others of the presence of your ladder.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 2) The base of a ladder should be out a foot for every three feet of height.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 3) Always place your ladder on a firm and level surface.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 4) You should inspect your ladder daily before using it.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 5) Ladder placement on sidewalks does not require use of warning devices, such as safety cones, since a pedestrian running into your ladder will probably not knock the ladder out from under you. | <input type="checkbox"/> | <input type="checkbox"/> |
