

A five-minute training Series for Pest Management Professionals.

Intersections

Name _____

Date _____

	True	False
1) Intersections are always identified with a traffic light or a stop sign.	<input type="checkbox"/>	<input type="checkbox"/>
2) A “stale” green light is a light that was already green when you first viewed the intersection.	<input type="checkbox"/>	<input type="checkbox"/>
3) Leaving space between the front of your vehicle and the path of traffic in the intersection when stopped at a stoplight will help you avoid being pushed into oncoming traffic if hit from behind.	<input type="checkbox"/>	<input type="checkbox"/>
4) It is always within the law to turn right on red.	<input type="checkbox"/>	<input type="checkbox"/>
5) Pedestrians should yield to traffic at an intersection and it is safe to assume that they will remain safely on the curb until all traffic has cleared.	<input type="checkbox"/>	<input type="checkbox"/>
