### Avoiding Slip and Trip Hazards

Name \_\_\_\_\_

Date \_\_\_\_\_

- |   | True                     | False                    |
|---|--------------------------|--------------------------|
| 1) Assess the hazards present at your work location each and every time you visit.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 2) If at all possible, carry everything you will need to complete the job in one trip around the perimeter. The steps you will save far outweigh the slip, trip, or fall potential. | <input type="checkbox"/> | <input type="checkbox"/> |
| 3) Some driveway and sidewalk surfaces become very slippery when damp.  | <input type="checkbox"/> | <input type="checkbox"/> |
| 4) Rain, runoff, dew, and lawn sprinklers can all adversely affect our walking/working surface.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 5) A hose or rocks that have been overgrown by shrubs or ground cover are examples of trip hazards. Name three other trip hazards you encounter on the job. _____                   | <input type="checkbox"/> | <input type="checkbox"/> |
