## Attic Access Ladder Hazards

Name \_\_\_\_\_

Date \_\_\_\_\_

- |   | True                     | False                    |
|---|--------------------------|--------------------------|
| 1. Falling debris is a common hazard when accessing attics.   | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. You should always inspect all ladders including, attic dropdown ladders, pre-climb.                                  | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. The folding hinges are an area of potential failure on an attic access ladder.                                       | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. If you notice cracked steps on a ladder, it is likely the ladder is compromised in multiple ways.                    | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Drop down ladders are typically safer than your own ladder because they have been installed as part of the building. | <input type="checkbox"/> | <input type="checkbox"/> |
