

Filter and Cartridge Change-Out Schedule

The service life of all filters is limited by considerations of hygiene, damage, and breathing resistance. All filters should be replaced whenever they are damaged, soiled, or causing noticeably increased breathing resistance.

Cartridge Change-Out Information				
Date	Amount of time Respirator is Worn (Min)	Total (Cumulative) Time respirator has been worn	Where worn	Product / Chemical Used
1.				
2.				
3.				
4.				
5.

16.				
17.				

1. Each time you use the respirator/set of cartridges, record the time it was used under "Amount of Time Respirator is Worn".
2. Add that amount to the time in the "Total/Cumulative Time" column.
3. Replace the cartridge after a maximum of 30 hours of use.

Factors that Reduce Cartridge Service Life

- Exertion level (work rate)
- Cartridge variability (charcoal content, characteristics)
- Temperature
- Humidity
- Multiple Contaminants
