

A five-minute training Series for Pest Management Professionals.

## Ladder Inspection Items

Name \_\_\_\_\_

Date \_\_\_\_\_

	True	False
1. Non-skid or non-slip feet are an add-on and not critical to the ladder inspection and use process.	<input type="checkbox"/>	<input type="checkbox"/>
2. Loose or bent hinges can be overlooked on your inspection as long as the ladder does not wobble.	<input type="checkbox"/>	<input type="checkbox"/>
3. Twisted or distorted rails can be checked by sighting along the rail.	<input type="checkbox"/>	<input type="checkbox"/>
4. Inspect new ladders promptly upon receipt.	<input type="checkbox"/>	<input type="checkbox"/>
5. Do not try to straighten or use bent or bowed ladders.	<input type="checkbox"/>	<input type="checkbox"/>
